EDUCATION

Bachelor of Science, Computer Science Graduating: May 2028
University of Cincinnati, Cincinnati, OH *Dean's List*

- Coursework: Data & Discrete Structures, Databases, Engineering Design Thinking, Software Engineering

SKILLS

Computer languages: C++, Java, GitHub, SQL, Python, PromQL, TypeScript, JavaScript, React Native, JSON

PROFESSIONAL EXPERIENCE

Software Developer May 2026-Aug 2026
Intern at Siemens, Milford, Ohio

- Designed an end-to-end Python automation pipeline from scratch, gathering requirements from managers and engineers and analyzing existing systems to develop a new container image management process
- Engineered automated labeling and cleanup workflows in Harbor, independently owning the project from initial design and implementation through testing, code reviews, demos, and production deployment
- Automated container image management using Python, Docker, Linux command-line tools, JSON/CSV logging, and custom scripts, eliminating months of recurring manual labeling and deletion work
- Maintained Gitlab repositories through version control, code reviews, and testing while incorporating feedback from technical demos to iteratively improve the solution

Software Engineer Aug 2025-Dec 2025
Intern at Kroger (Technical Digital), Cincinnati, Ohio

- Designed and implemented API monitoring dashboards in Grafana, leveraging Prometheus Micrometer, and Spring Boot Actuator to track critical RED metrics (Rate, Error, Duration) for performance and reliability
- Developed backend integrations to expose JVM and connection pool metrics, enabling visibility into memory usage, garbage collection, thread activity, and database connection health
- Collaborated via GitHub for version control and code reviews, contributing to backend code enhancements and maintaining clean, documented commits
- Configured automated alerting and dashboard templating for multi-environment support, ensuring proactive issue detection and SLA compliance, saving my team several hours of work

PROJECTS

Spatial Awareness Project for Deaf People Oct 2026
Knight Hacks IX | Swift, Python, jev, hugging fac, arkit

- Developed and tested iOS UI workflows for real-time speech captions and sound visualization, displaying detected sounds with priority-based alerts.
- Refined AI sound classification through targeted prompt engineering and contributed to computer vision features for person and object recognition, helping associate captions with speakers.

Personal Portfolio Web Application (Project Link) Feb 2026 - Present
Solo Project | Next.js, Node.js, React, Tailwind CSS, Figma

- Engineered and applied structured AI prompts by iteratively refining constraints, context, and structure to support application development, documentation, and UI refinement, producing reusable components aligned with project architecture
- Designed and developed a responsive portfolio web application featuring dynamic routing, reusable components, and an interactive resume viewer

EXTRACURRICULAR ACTIVITIES

Knight Hacks IX | University of Central Florida Hackathon Oct 2026
Disney College Program | The Walt Disney Company, Orlando, Florida Aug 2026-Present
Member | *National Society of Black Engineers, Cincinnati, Ohio* Aug 2023-Present
Tutor | *Bearcat Buddies, University of Cincinnati, Cincinnati, Ohio* Aug 2023-Present

HONORS & AWARDS

Best Use of Open-Source AI (Hugging Face) | Knight Hacks IX Oct 2026
University of Cincinnati, Dr. Edward N. Prather STEM Scholar Jun 2023-Present
Choose Ohio First Scholarship Program Aug 2023-Present
Emerging Engineer, UC CEAS Jun 2023-Present

AVAILABLE FOR CO-OP: SUMMER 2027
